

Chapter 5

LISTENING & CRITICAL THINKING

- **Lecture 1:** OVERVIEW OF THE CHAPTER – WHAT DO YOU NEED TO KNOW? (NOTE-TAKING)
 - Take notes on the overview slide –focus on active listening.
 - Think about how to answer the follow-up questions on the overview slide.
 - At home, prepare for the next lesson. Look at the task that needs to be completed.
- **Lecture 2:** PRACTICAL ACTIVITY – HOW THE CHAPTER WORKS IN PRACTICE (GROUP/PAIR WORK)
 - Look at the tasks that need to be completed. Complete it with someone next to you.
 - Create the chapter mock exam assessment questions on AI. Try to answer the questions without using the answer key.
- **Lecture 3:** LAB ASSIGNMENTS GRADED (individual WORK)
 - Make sure you have a device, or you use the university computers in the lab
 - Log onto your Online Account.
 - Access the assignment during the class time. This is a review of the chapter.
 - Keep note of the deadline and complete the rest at home.
- **STUDENT RESPONSIBILITY: READING CHAPTER–** (ONLINE COURSEBOOK + EXTERNAL READINGS)
 - Take notes on the overview slide –focus on active, independent reading.
 - Complete the weekly CHAPTER assignments on McGraw Hill Connect

(A) You should be able to define ‘listening’, ‘social media listening’ and the four steps to active listening

Listening:

Active listening: Listening with a purpose

1. _____

2. _____

3. _____

4. _____

Social Media listening:

(D) You should be able to review and define different types of attention:

What is Selective Attention?

Provide a definition and example of Automatic Attention: A police siren suddenly going off...

(B) You should be able to define the different forms of active listening.

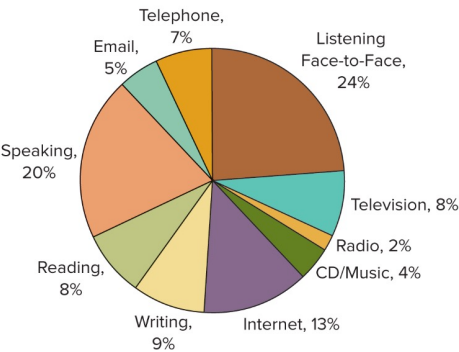

What is ‘empathic listening’? Do you do this in your daily life?

What is ‘critical listening’? Do you do this in your daily life?

What is ‘listening for enjoyment’? Do you do this in your daily life?

(C) You should be able to explain the importance of this diagram.

The proportion of time spent communicating by college students

(E) You should be able to define the process of what happens when stimuli enter your senses when you listen, be able to define and provide ONE example of all the barriers to listening and be able to explain the differences between men and women listening.

Task 5: Next Slide

(F) You should be able to list all the ways to become a better listener, how to effectively listen in the workplace, classroom (different notetaking skills), to media and in a second language, and the four steps of how to become an ethical listener.

1. What is ‘Critical Listening’, ‘First Person Observation’, ‘Second-Person Observation’?
2. Why is understanding source credibility using Stephen Toulmin's Data, Claim and Warrant concepts important?
3. Have you reviewed Chapter 4 – How to use Non-verbal communication effectively when listening?
4. What common lecture cues does your lecturer use in class?
5. Do you know the SIX (6) ways to check your understanding when listening?
6. What are 5 different ways to take notes; which ones do you use?
7. Do you know the four steps to become an Ethical Listener:

You may want to use this slide to take extra notes

1.5-hour Challenge – INDIVIDUAL CHALLENGE

Access [COURSERA](#)
and sign up with your
professional ID
(college email).

Step 1: In the search box, type and search for the course “How to Analyze Tweet Engagement with Twitter Analytics”.

Step 2: Get started by reading the **‘Project Overview’**.

Step 3: Start the course content by selecting ‘**Launch Tab**’ and ‘**Learn side-by side**’.

Step 4: Sign up or Log into your Twitter and follow the steps in the vide. **Complete the course at home and download your certificate that has your NAME** ('not Coursera Learner'). **Upload it to LMS**

The screenshot shows the Coursera Project Network interface for the project "How to Analyze Tweet Engagement with Twitter Analytics". The interface includes a search bar, a sidebar with navigation links (Project Material, Grades, Notes, Discussion Forums, Messages, Project Info), and a main content area. The main content area shows the project overview, including a "Get started" button, a "Project Overview" section, and a "How to Analyze Tweet Engagement with Twitter Analytics" section. A QR code is displayed on the right side of the interface, labeled "Scan QR Code". Below the QR code, there is a section titled "Guided Project" with details about the project, including the instructor Carmen Rojas, the level (Intermediate level), the duration (1.5 hours), and the requirement (No downloads or installation required). A "Go to Guided Project" button is also visible.

Task: Complete the flow-chart about the Process of Listening.
Use the words below to complete the information at each stage

long-term stimuli short-term
cues 20 schemas 50% sensory
selective attention 25% ~~working~~ maintenance & rehearsal

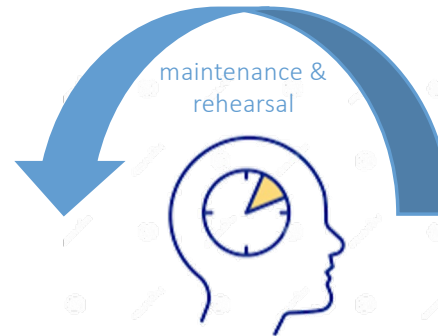

Stage 1 – We are exposed to environmental
(1) _____

Stage 2 – Stimuli enters our
(2) _____ memory

STOP – If you do not pay this sensory stimuli any attention, it is forgotten. Your brain will not retrieve it later as a memory. Paying attention means controlling your (3) _____. The tendency, when you expose yourself to information and ideas, to focus on certain (4) _____ and ignore others.

Stage 3 – If you pay attention to this sensory stimuli, the (4) ~~working~~ memory begins to function as it is the part of our (5) _____ memory that interprets and assigns meaning to stimuli that we pay attention to. The working memory retrieves patterns of sounds from the long-term memory – this is how we use language. The short-term memory has a (6) _____ second limit.

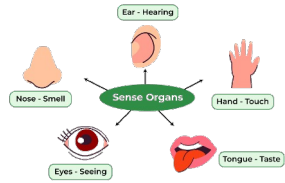

STOP – If you do not exercise '(7) _____ & _____ of this stimuli, it is forgotten. Your short-term memory will not retain nor retrieve it later as a memory. We retain (8) _____ of the information immediately after listening and only (9) _____ after a short delay.

Stage 4 – Our permanent storage place for information are placed in (10) _____ – this is the organizational “filing systems” for thoughts held in long-term memory. Schemas are part of the (11) _____ memory which stores information including but not limited to past experiences; language; values; knowledge; images of people; memories of sights, sounds, and smells; and even future dreams.

Sometimes we forget things because the clues we get, like words, pictures, or smells, aren't clear enough to link to the correct schema in our long-term memory. It's like trying to remember someone's name but only having a small hint (their face) that doesn't quite help us recall their name completely.

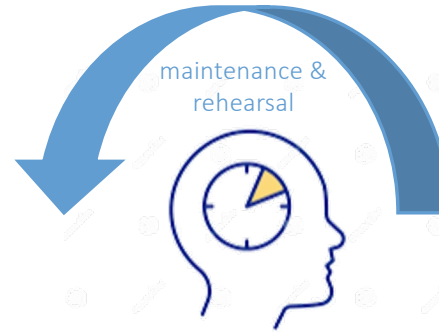

Stage 1 – We are exposed to environmental stimuli

Stage 2 – Stimuli enters our sensory memory

STOP – If you do not pay this sensory stimuli any attention, it is forgotten. Your brain will not retrieve it later as a memory. Paying attention means controlling your selective attention. The tendency, when you expose yourself to information and ideas, to focus on certain cues and ignore others.

Stage 3 – If you pay attention to this sensory stimuli, the working memory begins to function as it is the part of our short-term memory that interprets and assigns meaning to stimuli that we pay attention to. The working memory retrieves patterns of sounds from the longer memory – this is how we use language. The short-term memory has a 20 second limit.

STOP – If you do not exercise 'maintenance' & 'rehearsal' of this stimuli, it is forgotten. Your short-term memory will not retain nor retrieve it later as a memory. We retain 50% of the information immediately after listening and only 25% after a short delay.

Stage 4 – Our permanent storage place for information are placed in schemas – this is the organizational "filing systems" for thoughts held in long-term memory. Schemas are part of the long-term memory which stores information including but not limited to past experiences; language; values; knowledge; images of people; memories of sights, sounds, and smells; and even future dreams.

Sometimes we forget things because the clues we get, like words, pictures, or smells, aren't clear enough to link to the correct schema in our long-term memory. It's like trying to remember someone's name but only having a small hint (their face) that doesn't quite help us recall their name completely. Rehearsal helps keep the long-term memory

Noise as a Barrier to Listening

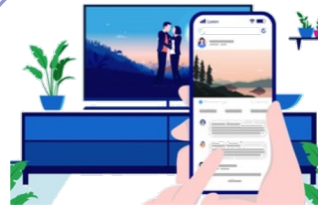

(a) physical distractions

(b) mental distractions

(c) multi-tasking

(d) factual distractions

(e) semantic distractions

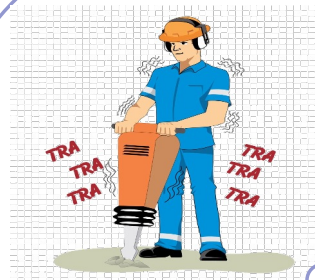

On the phone
& watching TV

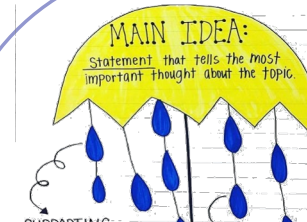

You stop listening if
someone says they're
from a certain country
you don't like.

Thinking of a
sick spouse

Construction
sounds

Focusing on details
but missing the
main idea

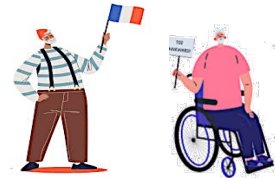

Perceptions of Others as a Barrier to Listening

(a) status

(b) stereotypes

(c) sights & sounds

Not accepting suggestions from a group of people because they are from a different culture/ability/age / gender from you

They distrust their coworker's judgment because he has tattoos and speaks in his native language to others.

Ignoring ideas from someone less experienced than you

Yourselves as a Barrier to Listening

(a) egocentrism

(b) defensiveness

(c) experiential superiority

(d) personal bias

(e) pseudo-listening

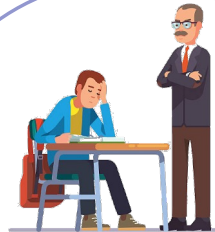

During a lecture, nodding acting like you agree with the professor's comments, while secretly texting on your phone.

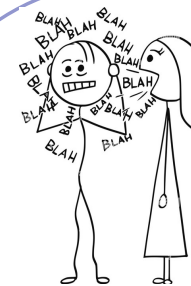

Not listening to a newly-qualified worker, since you have worked there longer

Believing your friend of many years always speaks the truth, even when you have evidence that she lies to her parents.

Taking a teacher's comments about your failed exam as a personal attack.

Changing a conversation to a different topic of your own interests

Women as Listeners ("W")
Men as Listeners ("M")

Purpose: Listen to take action and solve problems. ____

Preferences: Likes short, concise, error-free, clear communication.

Awareness: Are highly perceptive if the other person understands or not. ____

Non-Verbal Behaviours: less attentive, uses **glances** and eye contact to show liking. ____

Interruptive Behaviours: Interrupts less often with interruptions usually signalling agreement and support. ____

Purpose: Listen to understand other's emotions ____

Preferences: Likes complex information that needs careful evaluation. ____

Awareness: Often fail to recognise when others do not understand. ____

Non-Verbal Behaviours: More attentive, uses **sustained** eye contact with other people ____

Interruptive Behaviours: Interrupts more often with interruptions often used to switch topics. ____

Please help me create a quiz using the following keywords: [insert your list of keywords]. The quiz should be in an exam-style format and include the following types of questions:

1. True/False Questions (T/F):

1. Create 5 statements (one per keyword).
2. Ensure each statement is clear and unambiguous.
3. DO NOT Indicate whether the statement is True or False.

2. Multiple Choice Questions (MCQs):

1. Write 5 questions (one per keyword).
2. Provide 4 answer options for each:
 1. One correct answer.
 2. Three plausible distractors (incorrect answers).
3. DO NOT mark the correct answer.

3. Situational Multiple-Choice Questions (MCQs):

1. Write 5 realistic scenarios based on the keywords.
2. For each scenario, ask a question that tests understanding of the keyword.
3. Provide 4 answer options:
 1. One correct answer.
 2. Three plausible distractors.
4. DO NOT mark the correct answer.

4. Short Answer Questions (Fill-in-the-Gap):

1. Create 2 sentences with a blank where students must write the correct keyword or phrase.
2. DO NOT indicate the correct answers in brackets.

5. Essay Question:

1. Write 1 question describing a communication or situational problem involving one or more keywords.
2. Include 3 sub-questions that require thoughtful analysis or application of the concepts.

Answer Key Page:

• Provide all correct answers on a separate page at the end of the document.

• The answer key should include answers for:

- True/False Questions
- Multiple Choice Questions (MCQs)
- Situational MCQs
- Short Answer Questions
- Essay Question answer in 200 words only

Output Requirements:

- Format: The quiz must be created in an exam-style layout and saved as a Word document.
- Answer Key Placement: The answer key must appear only at the end of the document.
